# Henniker Plasma Celebrates Being Granted Made In Britain Membership

## HENNIKER PLASMA CELEBRATES BEING GRANTED MADE IN BRITAIN MEMBERSHIP

Henniker Plasma, one of the leading British manufacturers of plasma surface treatment equipment, has been accredited as a member of Made in Britain. Henniker Plasma's adoption of the official, protected mark will help to assure its customers that, along with their existing ISO 9001 accreditation, its products are of the best quality, great value and manufactured in Britain.

The mark also lets buyers know that Henniker Plasma is a trusted company that values transparency, sustainability and ethical business practices. Consumers are increasingly recognising the Made in Britain mark as a mark of confidence.

"We are pleased to be able to use the Made in Britain standard for our products. By joining the organisation, our business is making it really clear to buyers that not only are we manufacturing in Britain, but that they can expect the highest quality of design, innovation, product and service from us." Terry Whitmore, Managing Director of Henniker Plasma.

John Pearce, chief executive of Made in Britain said: "We're delighted that Henniker Plasma has joined the community of more than 1200 British manufacturers. The more the mark is used and seen, the more it is recognised as a mark of quality. In addition to getting access to the official protected mark, Henniker Plasma will also start to enjoy the many other benefits membership to Made in Britain brings. We look forward to watching Henniker Plasma grow with our help and support."

"We are pleased to be able to use the Made in Britain standard for our products. By joining the organisation, our business is making it really clear to buyers that not only are we manufacturing in Britain, but that they can expect the highest quality of design, innovation, product and service from us."

## PRESS RELEASE

## ABOUT HENNIKER PLASMA

Henniker Plasma is one of the leading manufacturers of plasma treatment systems for cleaning, surface activation to improve adhesion, and functional nano-scale coating.

Backed up by more than 20 years of experience, Henniker's innovative plasma treatment equipment is trusted globally in both critical industrial manufacturing settings to solve key adhesion challenges, and by leading academic research groups helping to support a wide range of fundamental research.

Henniker's advanced plasma systems are configurable tools that are both robust enough for reliable, repeatable industrial processing and at the same time flexible enough for the research into, and development of, leading-edge plasma processes. They transform materials, adding significant functionality and value.

## ABOUT MADE IN BRITAIN

The Made in Britain organisation helps Britain's manufacturers to grow. It provides support to its members in sales, marketing, PR and export.

Members of Made in Britain can be found in a searchable directory as [madeinbritain.org](http://madeinbritain.org), which gives detailed information about their manufacturing business, including company news and links to their websites and social media activity. Buyers and procurement professionals use the Made in Britain directory to find suppliers.
